
ZAINUL ABIDEEN EH

Full Stack Developer | ASP.NET Core • Angular • NestJS • SQL/MongoDB

(+91) 9605719902 | zainulzain043@gmail.com | Thrissur, Kerala | [LinkedIn: linkedin.com/in/zainul-abideen-eh](https://www.linkedin.com/in/zainul-abideen-eh) | <https://zainulabideeneh.com/>

PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer and Team Lead** with expertise in **ASP.NET Core, Angular, React, and NestJS**, experienced in designing, developing, and deploying scalable **web and mobile applications**. Skilled in **C#, TypeScript, Web API, SQL, MongoDB, and Azure Cloud**. Adept in **Agile methodologies, CI/CD pipelines, Azure DevOps, and Test-Driven Development (TDD)**. Experienced Team Lead managing system architecture, pull request reviews, Git workflows, and developer mentoring. Passionate about building **secure, high-performance, and user-friendly software solutions** with clean architecture and maintainable code.

SKILLS AND STRENGTHS

Frontend: HTML5 | CSS3 | TypeScript | Angular | React | Bootstrap | JavaScript | Figma | Blazor | Razor Pages

Backend: ASP.NET Core | C# | Web API | MVC | NestJS | Node.js | OOPs | Middleware | Services

Mobile: .NET MAUI (Cross-Platform iOS & Android)

Database: SQL Server | SQLite | MongoDB | Entity Framework | ORM

DevOps & Tools: Azure Cloud | Azure DevOps | CI/CD Pipelines | GitHub | Git Management | Agile (Scrum/Kanban) | TDD

Leadership: Team Lead | System Architecture Design | Pull Request Review | Code Mentoring | Sprint Planning

Other Skills: RESTful API Development | Authentication (JWT) | Debugging | Problem Solving | System Design

PROFILE SYNOPSIS

- Designed and developed **responsive, user-centric interfaces** using Angular, React, Bootstrap, TypeScript, and HTML/CSS.
- Built **scalable back-end services** with ASP.NET Core, C#, Web API, MVC, and Razor Pages.
- Integrated **SQL Server, SQLite, and MongoDB** with **Entity Framework** and **ORM** for efficient data access.
- Implemented **middleware components** for logging, authentication, and caching to improve reliability.
- Deployed and maintained applications on **Azure Cloud**, configuring **CI/CD pipelines** via Azure DevOps for automated releases.
- Led development team as **Team Lead** — managed Git repositories, reviewed and merged pull requests, and enforced code quality standards.
- Designed complete **system architecture** and technical documentation for enterprise-level projects.
- Practiced **Agile and Scrum** methodologies, contributing to sprint planning, reviews, and retrospectives.

- Utilized **TDD** to ensure maintainable, bug-free code and reduce production errors.
- Documented technical specifications, architecture, and deployment workflows for knowledge sharing.
- Collaborated with cross-functional teams to optimize performance and align features with business goals.

Soft SKILLS

- Strong problem-solving and analytical thinking
- Team leadership, mentoring junior developers, and driving engineering excellence
- Excellent collaboration and teamwork abilities
- Adaptability to new technologies and environments
- Effective communication and interpersonal skills
- Time management and task prioritization
- Attention to detail and code quality
- Creative and proactive approach to challenges
- Agile mindset with experience in Scrum and Kanban practices

WORK HISTORY

Software Engineer | Team Lead , Feb 2026 to Present | **AISERWIN** | United Arab Emirates (Remote)

- Led the full project team and owned end-to-end delivery from **system architecture design** to **Azure cloud deployment**.
- Architected and developed scalable enterprise solutions using **ASP.NET Core, Angular, SQL Server**, and **Azure DevOps**.
- Managed **CI/CD pipelines** and automated deployment workflows on Azure DevOps for continuous integration and delivery.
- Reviewed and merged developer **pull requests**, enforced code quality standards, and managed Git repositories and branching strategy.
- Mentored junior developers, conducted sprint planning, and drove **Agile best practices** across the team.
- Designed complete **system architecture** and technical documentation for all active projects.

Software Developer , 09/2024 to 01/2026 | **Nazer Nazer Digital Media Co** | Abu Dhabi, UAE

- Serving as a **Full Stack Developer** for **CAAD**, a live **ERP solution** built using **NestJS, Angular 18**, and **MongoDB**.
- Developed and maintained both frontend and backend modules, ensuring seamless integration and high performance.
- Built **REST APIs** using **ASP.NET Core** and optimized server-side performance, improving scalability.
- Implemented **real-time data processing** and client-server communication for enhanced responsiveness.
- Collaborated with cross-functional teams to design new features aligned with business requirements.
- Conducted **unit and integration testing**, significantly reducing post-deployment issues.

- Played an active role in **Agile sprints**, delivering features on schedule and ensuring smooth deployments.

ASP.NET core , 09/2023 to 09/2024 | **Aitrich Technologies** | Thrissur, Kerala

- Designed and implemented **responsive front-end components** using Angular, TypeScript, HTML, CSS, and Bootstrap.
- Developed **scalable backend services** in **ASP.NET Core** with **Razor Pages, MVC, Blazor, and Web API**.
- Improved mobile engagement by **25%** and reduced bounce rate by **15%** through optimized UI/UX and responsiveness.
- Managed and optimized **SQL databases** using **Entity Framework** and **migrations** for performance tuning.
- Created and integrated **middleware components** for logging, caching, and authentication.
- Deployed applications on **Azure Cloud** with fully automated **CI/CD pipelines** for continuous integration.
- Followed **TDD practices** to maintain high code quality, reliability, and maintainability.
- Collaborated in **Agile teams** for sprint planning, code reviews, and performance optimization.

PROJECTS

CAAD (Complete ERP Solutions)

Technologies : NestJS, MongoDB, Angular 18

A comprehensive ERP platform integrating modules for **inventory, billing, CRM, and reporting**. Designed for enterprise scalability and real-time data handling, improving operational efficiency across departments.

Melizzo – E-Commerce Software

Technologies: React (Frontend), ASP.NET Core (Backend), SQL Server, JWT

Full-featured e-commerce software platform with a React frontend and ASP.NET Core backend. Supports **product listings, shopping cart, order management**, secure payment processing, and an intuitive admin dashboard for complete store management.

JetFuel Website

Technologies: ASP.NET Core, Angular, SQL Server

Corporate web application delivering a high-performance, responsive user experience with dynamic content management, optimized page load, and seamless backend integration.

Mark Media

Technologies: React (Frontend), ASP.NET Core (Backend), SQL Server

Digital media management platform built with a React frontend and ASP.NET Core backend. Enables **content creation, publishing workflows**, and media asset management with role-based access control and responsive design.

AI Bayan Businessmen Project

Technologies: NestJS, Angular, MongoDB

Business networking and management platform for professionals. Features include **member profiles, business directory, event management**, and collaborative tools tailored for a professional community.

Learning Management System (LMS)

Technologies: ASP.NET Core, Angular, SQL Server, JWT

End-to-end e-learning platform with **course creation, student enrollment, progress tracking**, assessments, and role-based access for admins, instructors, and students.

Sales App

Technologies: NestJS, Angular, MongoDB

A dynamic sales management application designed for sales representatives and administrators. Enables salesmen to create, update, and manage customer orders, handle returns, and track daily sales. Includes customer creation, reporting, and sales performance analytics for streamlined business operations.

Self Food Ordering Kiosk

Technologies: NestJS, Angular, MongoDB

A self-service food ordering system allowing customers to browse menus, customize orders, and complete transactions without staff intervention. Built with a responsive UI and real-time order management for faster service and improved user experience.

Travel Expense Tracker

Technologies: ASP.NET Core, Angular 18+, SQL Server

A travel expense and income management system developed for a Georgian client. Supports multiple user roles (Admin, Driver, Accountant) with modules for trip tracking, expense logging, reimbursements, and real-time reporting for financial transparency.

Job Portal System

Technologies: ASP.NET Core, Angular, Web API, SQL, JWT

Full-stack job portal with **Admin, Employer, and Job Seeker** modules. Features include role-based access, job management, profile handling, and secure authentication.

CYANSTORE (E-Commerce)

Technologies: ASP.NET Core, Angular, SQL Server, JWT

Developed an end-to-end e-commerce system supporting **multi-category product listings, shopping carts**, and **secure payments**, offering a seamless and responsive user experience.

Library Management System

Technologies: ASP.NET Core, Angular, SQL Server, JWT

Implemented a complete library solution for managing **book inventories, user roles, and borrowing activities** with **secure authentication** and **real-time updates**.

CARTX (E-COMMERCE)

Technologies: ASP.NET Core, Angular, SQL Server, Web API, JWT

Built a scalable e-commerce app with **shopping cart, order management**, and **secure checkout**, focusing on UI responsiveness and backend optimization.

EDUCATION

Bachelor of Science in Computer Science

Assabah Arts and Science College, Valayamkulam | 2020 – 2023

Higher Secondary Education

GHSS Chalissery | 2018 – 2020

SSLC

GHSS Chalissery | 2018

CERTIFICATION

- Certified Asp.NetCore Developer
- Certified Advanced Front-End Developer
- Certified Test Driven Developer (Angular)
- Certified Software Engineer Trainee
- Certified JavaScript Developer • Certified UI UX Designer • Certified Web Developer.
- Certified Agile Practitioner
- Certified System Analyst
